P: 267-277-3402 | shakyuldashev@gmail.com | github.com/shaky1996 | linkedin.com/in/shak-yuldashev

EDUCATION

Bachelor of Science in Software Engineering

Graduated: Apr 2026

Western Governors University, Salt Lake City, UT

- **Relevant coursework:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Engineering, Software Architecture & Design, Database Management, Operating Systems, Cloud Computing, Software Security

Full Stack Web and Mobile Development

Graduated: Feb 2024

Nucamp Coding Bootcamp, Remote

- Developed full-stack applications, implemented backend services, and followed Agile methodologies in collaborative settings

Associate's Degree in Business Administration

Graduated: Jul 2020

Montgomery County Community College, Blue Bell, PA

SKILLS

Technical Skills: HTML5, CSS3, JavaScript, Java, Python, React, React Native, Node.js (Express), Tailwind CSS, Bootstrap, SQL, MongoDB, PostgreSQL, Docker, Git, REST APIs, OOP, SDLC, AWS (Cloud Fundamentals)

Certifications & Training: AWS Certified Cloud Practitioner | CompTIA Project+ | ITIL® 4 Foundation | WGU Front-End Developer | WGU Back-End Developer | Nucamp Full Stack & Front-End Development

PROJECTS

ActiveTrack - Fitness Tracker (Capstone Project) | https://github.com/shaky1996/activeTrack/tree/working_branch

Java, PostgreSQL

- Developed a full-stack fitness tracking application using Java and PostgreSQL for persistent data storage
- Designed and implemented database schema to store user profiles, workouts, and progress tracking data
- Built backend logic to handle CRUD operations and manage fitness records
- Applied object-oriented programming principles and software engineering practices to structure application logic

CDL Wallet | https://github.com/shaky1996/cdl_wallet

React Native, JavaScript

- Developed a mobile application for Commercial Driver's License (CDL) holders to securely store and manage license and medical card information
- Implemented expiration tracking with automated reminders for document renewals
- Enabled secure sharing of credentials with employers by converting stored image files into shareable PDF documents directly within the app
- Designed a privacy-focused, on-device storage system to ensure sensitive documents remain securely stored locally on the user's device

WORK EXPERIENCE

Safety Manager / IT Support

Jan 2025 – Present

Uz Sam Trans Inc, Philadelphia, PA

- Managed driver compliance, safety records, and operational documentation for fleet operations
- Provided technical support for office systems including hardware, software, and network troubleshooting
- Installed, configured, and maintained workstations, printers, and office IT infrastructure
- Improved operational efficiency by resolving day-to-day technical issues for staff
- Maintained and organized digital records for drivers and regulatory compliance tracking
